MON-TCH7 v1.4.6.62413:
LIST OF IMPROVEMENTS

1) **CUSTOMIZABLE WAKE-UP SCREEN**

   Users can now configure the wake-up screen to display the live view immediately upon activation.

2) **IMPROVED INTERFACE LAYOUT**

   The Arm/Disarm button has been swapped with the Do Not Disturb (DND) button on the main screen for a more intuitive experience.

3) **CUSTOMIZABLE DOOR UNLOCKING**

   Users can now define which door to open using the touch key on the device, providing greater flexibility.

4) **CALL LOG SNAPSHOTS**

   Snapshots from the call log will now be displayed, making it easier to review past interactions.

5) **REFINED CALL HANDLING**

   Opening the door from the monitor will now completely stop the call, ensuring a smoother user experience.

6) **EXTENDED SLEEP TIMER OPTIONS**

   Users can now select sleep durations ranging from 10 seconds to 5 minutes.

   (Note: The 1-hour option has been removed due to overheating issues.)

7) **EXPANDED IPC INTEGRATION**

   Users can now add IP cameras from multiple interfaces, not just the live view.

8) **FULL INTEGRATION WITH DOORBELL**

   The system now seamlessly integrates with the doorbell for improved connectivity.

9) GENERAL BUG FIXES AND STABILITY ENHANCEMENTS

Various reported bugs have been addressed to improve overall performance.
