

Updating DEC-0104(1U) Decoder FW(2.1.3):

Please follow the instructions below to update your DEC-0104(1U) decoder.

Important notices:

- 1) The update can be done locally or using a web browser.
- 2) The update will take 7-15 minutes. Please keep the decoder connected to power through the whole update process.
- 3) The update will restore the decoder settings to factory default.

Update instructions:

Locally

- 1) Extract these files from the .RAR file: appfs3536, ubt3536s, ubt3536m, rfs3536s, rfs3536m, krn3536s, krn3536m (except first one, others are in os folder)
- 2) Copy all above files to an **empty** USB formatted to FAT32.
- 3) Plug the USB into the decoder.
- 4) Restart the decoder.
- 5) Wait for the process to finish.

WEB

- 1) Extract **appfs3536.pkg** from the .RAR file.
- 2) Go to "Device Settings > Upgrade > choose **appfs3536.pkg** > Press "Upgrade"

Please contact your local support for any questions.

Best Regards,

Provision-ISR Technical Team.
