

**Ossia v1.2.6.0 Read before:**

Ossia v1.2.6.0 update is only via flash burning process.

**The update will reset all settings to “Factory default”.**

Please follow the instructions below:

- 1) Please extract & copy the flash files of the device model into the “root directory” of an “MBR”(Bootable drive) USB pen FAT32 formatted.
- 2) Insert the USB pen to the front USB port of the device.
- 3) Reboot the device via the main menu / or by powering Off & On.
- 4) The process can take up to 10 minutes, and it might not show anything on the screen.
- 5) Please wait till you will get the live view display with the Wizard window.
- 6) Now you can finalize setup using the desired settings.
