

FIRMWARE ANNOUNCEMENT

March 2025

SUBJECT

Experience the improved **Ossia DVR - V1.4.2**

Ossia DVR v1.4.2 (supported models at the end)

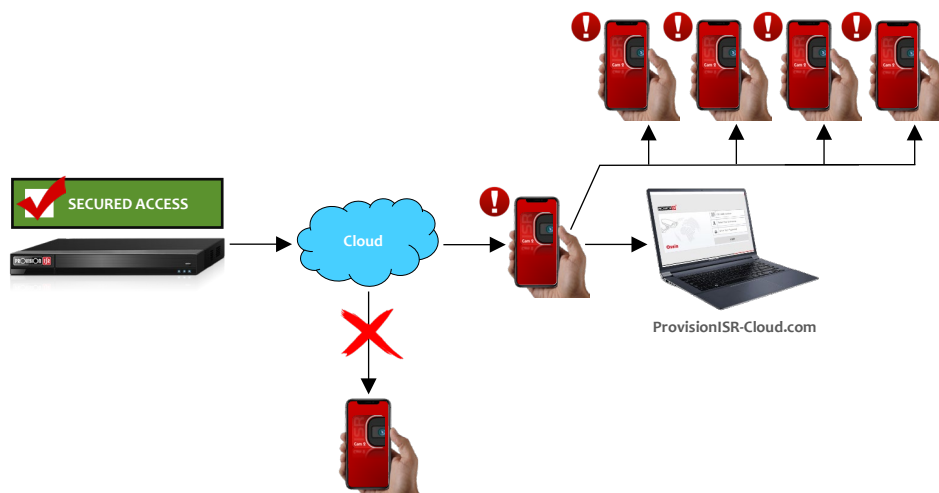

LIST OF IMPROVEMENTS:

1) NEW: SECURED ACCESS

Just like in our NVRs, Secured Access is now available on DVRs, adding an extra layer of protection against unauthorized cloud access.

Before this new feature, anyone scanning the QR code or using the S/N with the right credentials could log in to the DVR using the cloud.

So, no more easy QR code logins! Anyone **scanning the QR code is blocked**, and cloud website access now requires **Double Authentication**. A push notification is sent to the **bound end-user** (the owner) with a **one-time code** to give to the person trying to access the DVR.

2) BUG FIXES

General improvements and stability enhancements.
